Business Manager's Report

Please take time to recognize your newly-elected Local 441 Officers who are highlighted in this edition of the Kansas Direct Pipeline, and thank you to the past officers for their valuable service and commitment to Local 441. Involvement in your Local Union is critical to the success of any labor organization. This is something each of us can work toward, from the first year apprentice to the life member. When the opportunity is presented to get involved in your Local Union, take advantage of it. Make certain that your financial obligations to this local and the United Association are current. This not only ensures you a voice, but also supports the organizations that fight to protect your working conditions and strive to collectively make sure you receive a fair pay and solid benefits for the skillful work you perform. Also, as a member, you have every right to know and understand anything we as your elected officers are doing to serve you. If you have any questions or concerns about your local union, I encourage you to pick up the phone and call or stop by the hall. There is nothing we can do to stop unjustified rumors, but we can be here to serve you and answer any questions you may have.

Since the last newsletter, apprentice applications and interviews have taken place. We had several excellent candidates and the decisions made by the members of the various Joint Apprenticeship Committees to determine which applicants would be accepted has been a difficult one. Currently, we have initiated 26 new first-year apprentices statewide.

Latest update on the Holcomb Expansion Project

On June 29th I was invited by Jerry O’Leary, Director of Energy for the UA, to attend a meeting in Washington D.C. between the Federal EPA and Sunflower Electric along with some others involved in the energy industry. The intent of the meeting was to review and discuss the impact of the preliminary EPA Maximum Achievable Control Technology Standards (EPA MACT Rules) proposed back in early April of this year.

Simply put, the emission limitations proposed by the EPA for new coal-based units are unachievable. In fact, EPA has not identified a single plant that can achieve all of the limits established by the proposed rule. Rather they have found one plant that can achieve one limit (for instance particulate matter), a different that can achieve a second limit (say mercury), and a third plant that achieve the third limit (acid gases), and so on to the point that EPA has now created a “Frankenplant” which they claim can do the job. Further, experts tell me that the limits established by the “Franken-parts” for mercury and hydrochloric acid gas could not have even been measured in the test timeline cited to support the limits. Therefore, it is the conclusion of these industry leaders that a new coal-based unit cannot possibly be constructed that meets the proposed new plant limits for hazardous air pollutants. The demand of the meeting was that EPA must properly determine an appropriate conclusion of these industry leaders that a new coal-based unit cannot possibly be constructed that meets the proposed new plant limits for hazardous air pollutants. The demand of the meeting was that EPA must properly determine an appropriate set of measurable and achievable limits that can currently be constructed using existing commercial technology. The proposed EPA MACT Rules are scheduled to be issued as a final rule November 16, 2011. If issued as proposed, a coal-based plant cannot be designed or guaranteed to meet the new plant requirements. In fact it was pointed out in the meeting that there are actually a total of 12 new units permitted across the country including Holcomb that have been put on hold pending the outcome of this final ruling. Imagine if you will the number of jobs that vanish because of this.

[Continued on Page 7]
Plumbing and Pipefitting Industry Retirement Plan of Kansas  

By Joe Pucci, Plan Administrator

During the Wolf Creek outage, I received many calls from Participants asking if the employer(s) were making contributions to the Plumbing and Pipefitting Industry Retirement Plan of Kansas or to the 401(k) Plan. Local 441 has only one defined contribution plan. That is the Plumbing and Pipefitting Industry Retirement Plan of Kansas. This Plan is a 401(k) Plan. All Zones participate in this Plan and have since 2005. MassMutual holds the assets for the Plan. Part of the confusion was caused because some of the employers reported the amount of some members deferred wages (employee contributions) under “Savings Account” on the check stub.

If you worked on this job in the Topeka Zone 2A, the journeyman contribution rate was $2.75 per hour. For 2nd thru 5th year apprentices, the rate was $1.75 per hour. To my knowledge, all contributions, both employer and employee, have now been received correctly.

The fact that at least one employer reported the employee deductions as contributions to a savings account concerns me. The employers did make all required employer and employee contributions, but by listing it as a contribution to a savings account, I am afraid they may consider the amount of employee contributions to be taxable. When you receive your W-2 Form from any employer, your Social Security wages should be higher than your taxable wages, if you made employee contributions (deferred wages) thru your employer to the Plan. If you chose to make employee contributions and your W-2 Form is not completed correctly, I suggest you contact the employer and tell them they have made a mistake on your W-2. If you have any problems finding an employer that you worked for during 2011, please contact me at (620) 232-3799 and I will try to assist you.

On June 1, 2011, some of the rates for employer contributions changed. The Journeyman and Apprentice Employer contribution rates for each Zone are listed below.

Frontenac Zone 1B - Journeyman $2.10 per hour - Apprentices same
Lawrence Zone 2B - Journeyman $2.75 per hour - Apprentices 1st Year $0.00 - 2nd thru 5th $0.75
Topeka Zone 2A - Journeyman $3.00 per hour - Apprentices 1st Year $0.00 - 2nd thru 5th $1.00
Wichita Zone 1A - Journeyman $0.50 per hour - Apprentices same - Hutchinson Agreement $0.20

You should be receiving a Statement from MassMutual each quarter. If you are not receiving Statements, please contact me at the above phone number. Each quarter, after the Statements are sent by MassMutual, I receive calls from Participants that cannot match their Statement to their record of the hours they worked during the quarter. This is not surprising, as the Statements will never match the hours you worked during the quarter and this can be very confusing. As an example, the Statement you received for the 1st quarter of 2011 reflected the hours you worked in November, December 2010 and January 2011. The Statement for the 2nd quarter should reflect hours worked in February, March and April 2011. This lag is caused by the system used nationwide to collect contributions for multi-employer plans. April hours, if reported properly, are received by our bank by May 15. We will try to send the contributions for April to MassMutual by June 10. This allows us to balance the April contributions to the April bank statement before sending the allocation and the funds to MassMutual.

Tracking your hours using the above method should work, unless your employer does not make contributions in a timely manner or if you are working outside of our jurisdiction. If you are traveling to another local to work, your employer will send your contributions to the fund office of the host local union. The host fund office will then transfer your pension hours and contributions to the National Pension Plan. The National Pension Plan will then reciprocate your “pro-rata” contributions to our Plan. There are exceptions. If, and I stress if, all involved handle their duties in a timely manner, we will receive the contributions approximately 3 months following the month you worked. This means that when you travel there is really no method of matching your hours worked to the MassMutual Statement, but if you have questions and contact me, I can match the contributions received to the amount on your Statement and tell you what employer contributions are reflected on the Statement. There are no employee contributions when you travel to work in another local. One last thought before closing. From time to time, Participants ask me in which MassMutual Investment Accounts they should invest their contributions. I would be breaking federal law if I gave any advice, even if I tell you how my account is invested. The Trustees hired Ben Newhouse to assist you and them. If you have questions about the different options offered under the Plan, please contact Ben at his toll free number, (866) 577-7101.

If any of the foregoing conflicts with the rules of the Plan, the Plan Document(s) will govern.

State Building Trades Meet

Building Trade representatives met in Emporia in June to discuss upcoming work in Kansas and hear from state political leaders.
Employment Dispatch

Hello Brothers and Sisters,

I reported in the last article that our work should improve as we get into spring. I don’t have to tell you that I missed my prediction. We are still waiting for the work to improve. It seems that every time we think a major project is going to happen, it either gets cancelled or pushed back.

The good news is that we did have a pre-job meeting with P1 Group and Midwest Mechanical in regards to the Ft. Riley hospital project. P1 and Midwest teamed up to form a joint venture as one company to build a project of this size. It will start in mid-July and peak manpower will be between 90 and 100 UA members and last for 22 months.

Mechanics Inc. also has the first phase of the casino project in Mulvane. There are three phases to the project and if the other two are awarded to Mechanics Inc., we will be sending more manpower there.

Work on the road is spotty. I am able to get welders out, but it is still very tough to get a pipefitter or plumber out. Most locals that have work are taking care of their sister locals and unfortunately, right now, our local doesn’t have a sister local with full employment.

I would like to thank everyone that participated in the outage at Wolf Creek. Atlantic Plant Maintenance reported that it was a huge success. The plant manager for Wolf Creek had an article in their plant newspaper that I would like to quote.

Russell Smith, plant manager, talked about the level of professionalism among our outage work force. A prime example is the 38 welders here with APM to support the turbine rotor replacement project. All 38 welders, who are out of the Wichita UA Local 441, passed Wolf Creek’s welding test. It is very unusual for a 100% pass rate, especially with so many coming in at one time. These welders not only show great skill, but they also have some of the best housekeeping and work practices. The Field Work Monitoring Team has seen. They show a high-degree of concern not only for their safety but also for the safety of those around them by using 360-degree flash screen coverage around their work area, which protects everyone from flash burns to the eyes.

This type of recognition will go a long way for future work in that plant for Local 441.

Keep up the good work and do it safely!

Fraternally,

Bill Urton (316) 265-4291
Business Representative/Dispatcher

Manhattan/Fort Riley Area

Dear Brothers and Sisters:

Congratulations to MMC and P1 Group for securing our work on the New Hospital Project at Fort Riley. The two companies developed MMC/P1 Joint Venture and worked as one to secure this very important project. The Project will commence in Mid-July 2011 and scheduled to be completed June 2013. Exceptional organization, cooperation, and production will be required to meet such an aggressive schedule. I look forward to a successful project that employs numerous Brothers and Sisters.

Another significant project in the area has been temporarily delayed. The NBAF Facility is not on the original construction schedule, but site work has continued. I hope by the time you read this, or shortly after, a Fair Contractor has been awarded the Utility Plant portion of the Project.

Numerous projects are currently under construction, and many more are scheduled. McElroy’s, Mid-American Water and Plumbing, Reid Plumbing, Hussmann, JCI, Associated Mechanical, Environmental Mechanical, Waldinger and U.S. Engineering are some of the fair contractors that have been working in the area. Unfortunately, you don’t have to look very far to find unfair contractors working on projects in the area. We will continue to hold them accountable whenever possible and raise their cost to a more level playing field.

I hope everyone has an enjoyable summer, and look forward to seeing you soon.

Fraternally Yours,

Phil Petty (785) 539-8977
Organizer/Business Representative

Lawrence Area

Dear Brothers & Sisters,

The Lawrence Area Chamber has succeeded in obtaining a new owner for the Plastic Plant in the East Hills area. Two contractors and nine men have worked for over two months on change order requests. Work at the KU Campus is going well with the following contractors: Chaney; P1 Group; Saladino; Van Hoecke; McElroys; and, Midwest Mechanical. Most of these contractors will have work in progress through the summer.

Hospital job and the ICI Plant in north Lawrence along with other small jobs in the area are helping with employment. Sterling Boiler is still going strong at the Powerhouse and should for another year. Hy-Vee grocery addition in Lawrence is still on-going. Fab shop at Taylor Forge has picked up some work for now. Work should be on-going throughout the summer.

The City has been in charge of the tearing down and clean-up of the old Coop Fertilizer Plant. Really makes a difference in the site appearance.

In closing, I want to wish everyone a safe and happy summer with family and friends.

Fraternally yours,

Denis Wittman (785) 843-3151
Lawrence Business Representative
930 E. 28th Street, Lawrence, KS 66046

Wichita Area Zone 1A

Greetings Brothers, Sisters, and Families.

Summer is upon us again and I hope the Kansas heat is not deterring you from your activities. As always, it is my honor to serve you as the business representative for the Wichita area.

First, I would like to begin with our current contractor and jobsite updates. The single most heavily manned project is the new Northeast High School in Wichita. This is the first new high school built in Wichita since Northwest was built in 1978. The project has Davis/Bacon provisions included as federal monies were secured in the bond provision. This project is a P&E Commercial Services jobsite with Jerry Short as the steward. We also have the first phase of the Kansas Star Casino. This would include the events center, which will also temporarily house the gaming area. The permanent gaming house will be included in Phase II that will be bid around the first of August. Work for the balance of our contractor base is slowly picking up. However, many of the projects on the books are out of the Wichita metro area, and many are in far western Kansas. The HVAC service industry continues to be strong with virtually all of our service managers claiming techs have been working long hours to cover the workload. At this time, the industrial piping industry has slowed substantially. Logan & Company currently is working on a manifold replacement project. In short, they are replacing an outdated underground manifold system with a new above ground system complete with updated electronic controls and valves to make better use of Williams underground storage facility in Conway, KS. Shelby McDonald is the piping general foreman and is working a complete crew of welders, pipelayers, and apprentices to meet the deadline for outage tie-ins scheduled for early August. As a whole in the area, industrial piping projects will be providing more work opportunities as the 2011 year progresses.

Next, I would like to thank everyone with the help and commitments in reference to plumbing and mechanical boards, continuing education, and organizing. Organizing is a touchy subject with members at times. Recently our needs have not been to bring new members in. My efforts have been focused upon educating non-members as to organize a non-union contractor. This is a very time consuming venture. Some avenues work very well at times and others do not. I feel very strongly that organizing is the key to market share recovery. Several of the other building trades crafts have proven this to be a fact, and I am meeting with them as often as I can to gain some insight of their successes. If we as a local union subscribe to the theory that once the non-union gets loaded down with work our contractors will be able to compete more, we will find ourselves losing even more ground to the non-union. Fact 1: The non-union companies have no plans of getting smaller. They will take every man-hour of work they can from union contractors. Fact 2: They can man any project they want to at standard wages and no benefits. Currently the average non-union plumber makes $16.50/hr with no benefits and they work everyday and have for years. My point being, we as a local union need to act on market recovery now. We cannot wait any longer. It is up to our membership to get involved!

The year 2011 has seen some good signs of improvement in the piping and plumbing market place. We look forward to several new projects bidding and already secured by our local contractors over the next six months. Industrial projects are looking to take off in 2012. Commercially, we will continue to struggle as long as our market share hovers around 7%. I look for that work to pick up, but only slightly.

In closing, I would like to announce our picnic will be Saturday September 24, at the Sedgwick County Zoo. This works out well as our graduating apprentice banquet is the evening before. This will give the young gentlemen from Lawrence, Topeka, and Frontenac a chance to take in Wichita’s world renowned Zoo and meet new members from another area. In the many conservations with members, interest for a local golf outing seems to be gaining momentum. I invite any one with ideas to please give me a call and we can set a group meeting to get this idea off the ground. I hope you all enjoy your summer. I am available 24/7 for the needs of the membership, and truly appreciate your support.

Fraternally yours,
John H. Shepherd Jr. (316) 265-4291
Plumbers & Pipefitters of Kansas Local #441
Wichita Area Business Representative Zone 1A

Congratulations! New Officers Sworn In for Three-Year Terms

Newly-elected officers for Local 441 were sworn in at the July 11th Union meeting and officially took office effective on that date.

Plumbers & Pipefitters LU #441
MILITARY DUES OFFICE POLICY
Local 441 pays dues for members who are on military duty.

REQUIREMENTS
• A letter or copy of orders for member filed
• Members need to keep in contact with the Local office and let us know at least once a year (or at the end of their active duty) as to their status as to their military duty.

Other Information
• Members need to notify Local 441 when they go back to work
• Local 441 only pays dues for the member if the member has been off the entire month
• Local 441 does NOT pay for death assessments. The member continues to pay those.

Plumbers & Pipefitters LU #441
SICK/DISABLED DUES OFFICE POLICY
Local 441 pays dues for members who are disabled as follows:

REQUIREMENTS
• A letter or document from a doctor for members who are disabled as follows:
  • Local 441 does NOT pay for death assessments. The member continues to pay those.

Other Information
• Members that are apprentices need to contact the Apprenticeship Office (316) 267-8508 as to their military status.
2011 HOLIDAY SCHEDULE
Monday, September 5th - Labor Day Holiday (All Zones)
Thursday, November 24th - Thanksgiving Day Holiday (All Zones)
Friday, November 25th - Day After Thanksgiving Holiday (Zones IB, IA, IB)
Saturday, December 24th - Christmas Eve Holiday (Zones IB, IA, IB)
Monday, December 26th - Christmas Day Holiday (All Zones)

2012 HOLIDAY SCHEDULE
Monday, January 2nd - New Year’s Day Holiday (All Zones)
Monday, May 28th - Memorial Day Holiday (All Zones)
Wednesday, July 4th - July 4th Holiday (All Zones)
Monday, September 3rd - Labor Day Holiday (All Zones)
Thursday, November 22nd - Thanksgiving Day Holiday (All Zones)
Friday, November 23rd - Day After Thanksgiving Holiday (Zones IB, IA, IB)
Monday December 24th - Christmas Eve Holiday (Zones IB, IA, IB)
Tuesday, December 25th - Christmas Day Holiday (All Zones)

UA Local #441 Plumbers & Pipefitters Monthly Union Meetings

KANSAS LOCAL #441 UNION MEETINGS
Second Monday of every month, 7 p.m.
(316) 265-4291/1330 E. 1st Street, Wichita

Next Meeting Dates:
Aug. 8, Sept. 12, Oct. 10

Frontenac Area Meetings

Tuesday mornings at Home Cafe, Cherokee, KS at 8 a.m.

Wichita Area Retirees
Meeting at the Hall, 1330 E. 1st Street N.,
on the first Wednesday every month at 10 a.m.
Breakfast is the second Wednesday of every month
(except December) at 9 a.m. at Spears Restaurant,
4323 W. Maple, Wichita.

Note: All retirees and spouses and former members’ widows
are welcome to attend any of the area meetings.

[Business Manager’s Report continued from Page 1]

I was encouraged in the meeting by the makeup of the
group and diversity of stakeholders that attended the meeting.
There was plenty of open and honest discussion as the
industry partners shared their specific thoughts. Vendors re-
layed the fact that they had no equipment and further there
was no technology available to manufacture equipment that
could meet the emission standards and therefore could not
issue guarantees to contractors such as Bechtel to build the
new units. Thus, all new coal-powered units have been put
on hold.

I am convinced that this type of dialogue proposed from the
stakeholders pointing out the effects of the pending MACT
requirements will lead to a greater understanding by the EPA of
just what is needed to allow a truly Clean Coal Technology
Agenda to go forward as was proposed by President Obama
during his campaign and as continued in much commentary
since becoming President. It is essential that the Federal
EPA is afforded unvarnished, pertinent information for
this process to continue. To allow an industry such as coal
powered generation to abruptly be stopped would not only
be devastating to our own industry, but also to that of
the entire United States.

On the state level, Holcomb is going through the court
process with lawsuits filed by the environmental groups. I
remain in constant communication with our contacts at Sun-
flower Electric Corporation and will continue to update the
memberships as information is received.

In conclusion, I would like to take this opportunity to
thank UA Director of Energy Jerry O’Leary for his tireless,
unwavering work and efforts to illustrate to the EPA just
how devastating to the industry the new emission standards
will be. Brother O’Leary will be retiring at the end of
this year and this is one Business Manager, as I am sure there
are many, which will sorely miss his constant battle for the
membership of the United Association.

Work smart, work safe, and may God bless each of you and
your loved ones.

Frontenac Area

Dear Brothers and Sisters:
I hope this finds you and your
family enjoying your summer!

Work in S/E Kansas is picking up!
Pittsburg State University
is involved in an Energy Man-
agement Savings project. This
project, which has been awarded
for PM Contracting out of KC, is
employing five to six men for the
summer.

CTS and Logan are both looking at the work in the up-
coming turnaround at the Coffeyville Refinery.

The work performed earlier this year at Sugar Creek
Packing Company went very well. Our members did such
a great job that Wagner and Meinert should be awarded the
upcoming fall project.

The Allen County Hospital should bid this fall and we
hope to gain much of the work. And the County Commiss-
ioners have been discussing the zoning of land north of
town for a new VA Hospital with 82% already funded from
Federal money. Hopefully we can fast track this project
(rumor has it).

I recently stopped by Evonik, the old Gulf plant in Ga-
lena, and met with the engineering department. It appears
that work within the plant is picking up and plans for a nice
expansion are in the works. Hopefully, a few union contrac-
tors will get to help with this project.

In closing, I would like to extend a “THANK YOU” to
everyone who supported me in the UA delegate election.

Ben Newhouse is Local 441’s
Independent Financial Advisor.
Members, please feel free
to give him a call at
1-866-377-7101, option 5,
for assistance and advice
with your Mass Mutual
investment account.

Topeka Area East

Brothers and Sisters,

Topeka received some good news! A M&M-Mars plant
will be built here. The first phase is expected to cost some
$250 million. Let’s hope the City of Topeka and the Chamber, along
with Go Topeka, didn’t cut any deals that would let the construc-
tion be brought in like most of the recent cases such as Target and
Home Depot just to name a couple. Looking at the area hours, we are up
in 2010 through now, but way down from 2007 and 2008. With the Fort
Riley Hospital, the NBAF rumors, if we could get our share
of this job North East Kansas would be a good place to be.
We will have our picnic at the Gage Park Zoo this year on
October 15th. Hope to see all of you there.

Apprentice News By Kerry Stine, Training Director

Where did the time go?
The first day of year school has come and gone. It is amazing how fast the time goes by when you are focused on a task. The first year went better than could be expected. As with any new system or project, there were a few hiccups along the way. The State of Kansas kept throwing us curve balls by changing their system on a regular basis, but we were able to work through it. There were plenty of times that apprentice schedules had to be changed to accommodate critical job schedules but we were able to work around it. Overall there were no obstacles that could not be overcome and the opportunity for the apprentices to learn has increased dramatically.

The credit for such a great start to the day school program goes to the instructors and the office staff. The instructors: Ken Englert, Steve Hogard, Dan McCulloch, Calvin Startzman, and Paul Preston, worked non-stop to put together an environment conducive to learning and that also engaged the apprentices both in the classroom and the shop. In the office, Kim Bushey and Jessica Hixon were constantly having some new certification or project pushed their way, but they kept their cool and always came up with a way to make it work.

Another group that deserves credit is the apprentices. Change is always difficult, but after the first rotation the apprentices settled into the routine and made the best of the new system. The apprentices have also offered up some good ideas for improvement and things to think about.

With the coming year there will be changes to classes and the layout of the weekly schedule. These changes come from the experience of the first year of the day school system. We are constantly looking for ways to improve the training program. If any of the membership has any ideas or thoughts that may be of help, please send them our way. We need all the help we can get.

The Regional Apprenticeship Contest took place June 8 & 9, 2011 at Local 597 Pipperfitters Training Center in Mokena, IL. Local 441 sent the following four contestants: Mike Wannow – Plumbing; Cody Brookshire – HVAC; Jamin Wayne – Pipperfitter; and, Anthony Hagar – Welding. All competed well, but unfortunately we did not crack the top three in any of the categories. Our guys were competing against apprentices from 11 states which included Kansas, Missouri, Iowa, Nebraska, Illinois, Minnesota, Wisconsin, North Dakota, South Dakota, Wyoming and Montana. There are some pretty large locals in some of these states and the competition is always close.

Instructor Ken Englert
With the help of the contractors and job supervision, all of the apprentices have concluded a full year of training, including any class time that they missed due to plant outages, turnarounds and out-of-town jobs. The 5th-year graduating class has successfully finished the UA Foreman Training class along with passing the UA certification test. We continue to include and upgrade safety training as an important part of the apprenticeship program. All of the 4th-year apprentices have completed the 30 hour “Confined Spaces” class and have achieved the required certification sponsored by the Center of Protect Workers Rights. The new class schedules have been given to all of the apprentices for next year, with classes starting August 22, 2011. I would like to congratulate the graduating apprentices for a job well done and encourage the remaining apprentices to strive to reach the title of “UA Journeyman.” They are our future.

Instructor Paul Preston
The apprentices have been testing for UA weld certification every Thursday for the past six weeks. We have tested over 70 apprentices with some passing and others getting the experience of a welding test. The STAR Pipperfitter Mastery was passed by seven 5th-year apprentices. Upcoming UA weld certification testing on August 27th in Wichita. Call our office at 316-267-8508 to sign up as there are still openings. I will be attending the UA convention in Las Vegas the first week of August and then the next week to Ann Arbor, Michigan for more knowledge!

Instructor Steve Hogard
Mike Wannow, Cory Ray, and Chris Torrez competed in the Local Plumbers Apprenticeship Contest. Mike Wannow advanced to the Regional 4 Contest in Chicago and placed 4th. Congratulations Mike on a job well done. Also, in the past year, 30 1st-year apprentices received their OSHA 30 training. Thirty-two 3rd year apprentices received their backflow certifications and 33 4th-years completed their medical gas certification of installer/brazing. We had 26 3rd year plumbers signed up to take their Journeyman Plumber Gas Block test at various times over the next three months. Good luck and congratulations to all apprentices in their accomplishments over the last year. Have a good summer and see you in August.

Instructor Dan McCulloch
The HVAC Department sent Cody Brookshire to Chicago for the Regional Apprenticeship Contest and he represented us well by placing in 5th place. Finishing us first year of day school and we have issued 22 EPA cards, 13 410A cards and 12 Green Awareness cards. Seven apprentices received their Journeyman Mechanical License with one receiving his Masters. It was a busy year and a lot of testing to all of our apprentices. Next year we are working on testing for UMC and UPC through NETC at school for state licensing so our computer lab will be getting a work out. To all of our apprentices, have a great summer and congratulations to our 5th years — we will see you at graduation!

We are looking for a workable steam boiler for the next school year if anyone is removing one or donations will be accepted with open arms. Please contact me at the school at 316-267-8508

Instructor Calvin Startzman
Over 100 apprentices have received their Rigging and the new OSHA crane signal qualification. This journeyman training is going very well. It is a two Saturday 8 hour CEU course which includes a written exam along with a practical exam for the signalperson. Good turnout in Topeka with 21 journeymen completing this course. There are still openings available for the July 16th and July 23rd class in Wichita.

Congratulations to Jamin Wayne for winning the local pipperfitters competition this year. He had to compete against Dustin Roudybush which was a very close call. Jamin went on to Chicago to compete with others. Classes are almost over for this year and I have started preparing for next year. It has been a learning experience for me as well as the apprentices.
